1. Claims 1-14 are allowed over the cited prior art.
2. The following is an examiner's statement of reasons for allowance: None of the prior art of record disclose or teach a constant current circuit with a control circuit that controls the operation of the first and the second transistors so that a voltage of a connection point of the second transistor with the first resistor is equal to that of a connection point of the first transistor with the first pn junction element and a proportional current generating circuit that generates a plurality of currents the currents being proportional to a current flowing in the first resistor, wherein the first resistor is connected to a potential difference generated by a difference of current densities flowing in the first and the second pn junction elements, the proportional current generating circuit consists of a plurality of transistors for generating proportional current to whose control electrodes a control signal output from the control circuit to the second transistor is input, and a current proportional to a current flowing in the first resistor is generated in each of the transistors for generating proportional current and the generated current is output.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
